

TFLT

TargetIncome™ Plus 2 ETF

ETF Category: Income - TargetIncome
As of 06/30/2020

KEY FEATURES

Floating Income Target

In aiming to exceed the 10-Year U.S. Treasury yield by 2%, net of fees, TFLT seeks to offer investors a specific outcome.

Dynamic Risk Management

TFLT's index looks to minimize portfolio risk by optimizing allocations across 11 potential asset classes while attempting to meet its stated yield target.

Monthly Distributions

TFLT makes distributions on a monthly basis.

Wilshire TargetIncome 10-Year Treasury +2% Plus Index™	6.66%	-2.06%	1.44%	-	2.18%

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. Returns for periods greater than one year are annualized. Market price returns are based upon the midpoint of the bid/ask spread at the close of the exchange and do not represent the returns you would receive if you traded shares at other times. For performance data current to the most recent month end, please call 1-888-493-8631, or visit www.globalxetfs.com.

DEFINITIONS

Wilshire TargetIncome 10-Year Treasury +2% Plus Index™	The Wilshire TargetIncome 10-Year Treasury +2% Plus Index™ seeks to provide broad exposure to income-producing asset classes using a portfolio of exchange-traded funds (each, an "Underlying ETF"), with the goal, but not the guarantee, of providing exposure that will be sufficient to support an annualized yield of the US 10-Year Treasury yield plus two percent (2.0%), net of fees. The Wilshire TargetIncome 10-Year Treasury +2% Plus Index™ targets an annualized yield that is somewhat higher than the US 10-Year Treasury yield plus 2% ("US 10-Year Treasury +2% Plus"), which is intended to provide the index with the ability to achieve the US 10-Year Treasury yield plus 2% target, net of fees. The Wilshire TargetIncome 10-Year Treasury +2% Plus Index™ allocates index weights among the Underlying ETFs based on a proprietary methodology developed by Wilshire Associates, which is designed to achieve the target income objective while also utilizing an optimization approach which seeks to minimize the overall risk of the portfolio.
S&P 500 Index	S&P 500 Index tracks the performance of 500 leading U.S. stocks and captures approximately 80% coverage of available U.S. market capitalization. It is widely regarded as the best single gauge of large-cap U.S. equities.
Annualized Volatility	The annualized standard deviation of the daily returns of the security using the closing levels of the index during the 22 index-day period preceding that day.
Beta	Measures the volatility of the Fund price relative to the volatility in the market index and can also be defined as the percent change in the price of the Fund given a 1% change in the market index. A beta below one suggests that the fund was less volatile than the market benchmark.
Sharpe Ratio	Measures the return for each unit of risk. The risk free rate is subtracted from the mean return and is divided by the standard deviation of returns.
12-month Dividend Yield	The yield an investor would have received if they had held the fund over the last twelve months, assuming most recent NAV. The 12-month yield is calculated by summing any income distributions over the past twelve months and dividing by the sum of the most recent NAV.

(1) Acquired Fund Fees and Expenses sets forth the Fund's pro rata portion of the cumulative expenses charged by the exchange-traded funds, closed-end funds, business development companies and other investment companies in which the Fund invests. These expenses are calculated based on the Fund's portfolio holdings during the prior fiscal period. The actual Acquired Fund Fees and Expenses will vary with changes in the allocations of the Fund's assets.

Global X Management Company, LLC serves as an advisor to the Global X Funds. The Funds are distributed by SEI Investments Distribution Co. (SIDCO, 1 Freedom Valley Drive, Oaks, PA, 19456), which is not affiliated with Global X Management Company, LLC or Mirae Asset Global Investments.

Investing involves risk, including the possible loss of principal. There is no guarantee that the Fund will achieve its investment objective or produce the targeted price or yield performance. In addition to the normal risks associated with investing, the Fund may invest in MLPs, infrastructure investments, REITs, mortgage REITs, and preferred stocks. Narrowly focused investments may be subject to higher volatility. High yielding stocks are often speculative, high-risk investments. These companies can be paying out more than they can support and may reduce their dividends or stop paying dividends at any time, which could have a material adverse effect on the stock price of these companies and the Fund's performance. TFLT is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Global X NAVs are calculated using prices as of 4:00 PM Eastern Time. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.

Since the Fund's shares typically do not trade in the secondary market until several days after the Fund's inception, for the period from inception to the first day of secondary market trading in Shares, the NAV of the Fund is used to calculate market returns.

Global X Funds are not sponsored, endorsed, issued, sold or promoted by Wilshire, nor does Wilshire make any representations regarding the advisability of investing in the Global X Funds. Neither SIDCO, Global X nor Mirae Asset Global Investments are affiliated with Wilshire.
